

# RECLAIM MAY DAY

## RECLAIM THE LABOUR MOVEMENT

Sick of this Labour government? Sick of weak, compromising trade unions? So are we.

The election of a Labour government is no answer to the problems we face as workers. Blair and Brown have pursued the same agenda of privatisation that the Tories did. This is no surprise – Labour are for the free market and capitalism – at the expense of the working class.

The trade unions have failed utterly to protect their members from this assault. Under their leadership there has been a continual erosion of working conditions and job security. They no longer even mention that Labour has retained the anti-union laws of the Thatcher era, let alone propose doing anything to get rid of them.

Let's rid ourselves of these parasites and create revolutionary industrial unions – one industry – one union – workers' control. We have no need of MPs and parties claiming to 'act on our behalf'.

Reclaim the labour movement. Join the Solidarity Federation.
